## Introduction

EVE is a programme within the HSE, whose primary ethos is to provide community-based recovery-orientated programmes for adults who experience mental health difficulties, intellectual difficulties, Asperger's Syndrome, and Physical and Sensory disabilities. We do this through our network of Vocational, Rehabilitative and Clubhouse services in 21 locations across HSE Dublin North East and HSE Dublin Mid-Leinster regions.

## Mission Statement

EVE seeks to provide a context which enables participants achieve wellbeing for themselves by promoting respect, empowerment and citizenship in the delivery of quality person-centred training, education and community services.

## Vision Statement

EVE is an programme committed to the development of cultures of wellness. We will achieve this through the delivery of hope-inspiring recovery-oriented services and environments in the pursuit of well-being. Ultimately, the success of the service will be judged by the participant. Our vision is to ensure that their evaluation reflects the fact that they have been treated with respect at all times, that they will have been assisted to achieve increased levels of independence and that they have been facilitated to integrate more fully into their community. The vision will be achieved through the partnership of staff, participants and the community and in the delivery of person-centred programmes.

## EVE's Guiding Principles for Hope-Inspiring Recovery-Oriented Services

1. The people who use our services determine their future and they direct their own recovery process.
2. We value individual differences across the life span.

3. We believe that "hope" and the ability to develop trusting relationships influences the recovery of users of services.
4. We are committed to operate from a strengths model which focuses on the person's unique strengths and believes in their capacity to learn, grow and change.
5. We believe that users of a service are able to recover more quickly when hope is encouraged, enhanced and/or maintained;
6. We believe that recovery from mental illness/distress is most effective when a holistic approach is considered; this recognises psychological, emotional, spiritual, physical and social needs.
7. We believe that community participation as defined by the user of a service is central to the delivery of a recovery-oriented service.
8. We believe that services are most effective when delivery is within the context of the service users' local community and cultural context.
9. We are committed to working within a collaborative framework that includes Bio-Psychosocial, Spiritual and Values-Based approaches. A Recovery approach embraces all of these.
10. We believe that the involvement of a person's family, partner and friends may enhance the recovery process. The user of a service should decide whom they

## EVE's Strategic Priorities

**Strategic Priority 1** – Promote Advocacy and Partnership in Service Development and Delivery.

**Strategic Priority 2** – Raise awareness of EVE Services.

## Services on Offer

1. **Foundation Skills training** – Foundation skills training programmes for people with disabilities are designed to equip participants with personal, social and work related skills that will enable them to progress to greater levels of independence and integration into the community. The programmes are designed to promote health and social gain for participants. Participants must be registered with the Rehabilitation Training Guidance Service of their local Health Office.
2. **Vocational Training** – Vocational training involves skills training to certification level for individuals who have expressed preferences for a particular skill area. The programme incorporates a strong career planning component with the emphasis on work preparation in addition to personal development and social skills modules. Participants must be registered with FÁS.
3. **Clubhouse** – Clubhouse is an innovative, member-led, community-based model for people with mental health difficulties, following a strong ethos of a work ordered day. The Clubhouse offers life-long membership and support, to enable members lead a socially and economically productive life in the community. Club activities are focussed around the club's work units and social and employment programmes.
4. **Occupational Services** – Occupational Services have a rehabilitative and development focus. The services are provided with the objective of maintaining and enhancing core capabilities and quality of life of people with disabilities. Occupational services offer individuals flexible and challenging opportunities to enhance both their personal and social development through a combination of structured occupational activities and support services, which are both centre-based and community-focused.

## APPLICATION FORM

Name: \_\_\_\_\_

Address: \_\_\_\_\_
